Full Stack (WordPress) Developer

We are looking for a Full Stack Developer to assist with creating well designed, efficient code around WordPress.

KEY RESPONSIBILITIES

We are looking for someone that understands WordPress, is familiar with WP core functions and how the entire thing works (think custom plugins and modules, as well as be able to develop themes). You would be responsible for both back-end and front-end development.

The ideal candidate will be able to hit the ground running, have the capacity to multi-task a wide range of projects, and the ability to quickly learn new technologies.

MANDATORY REQUIREMENTS

- At least 2 years experience in a similar role
- Advanced knowledge in PHP, JS, HTML, CSS, SQL
- Theme and plugin development (mostly for WordPress)
- Experience on E-commerce platforms
- Experience in managing, scoping, planning and executing web projects
- Git version control experience in a multi user environment
- Experience testing UI/UX for responsiveness across different devices and browsers
- Knowledge and experience with WCAG v2.0 for accessibility
- Good communication skills working in a collaborative work environment

PREDIKKTA

DESIRED

- SEO savvy
- Experience with other CMS' such as Magento, Drupal and Joomla
- Knowledge of AngularJS
- Knowledge of JIRA

TO APPLY

If you think you have what it takes for this exciting role, please get in touch using the form on our website telling us why you would be a perfect fit for the role.

We look forward to hearing from you.

Please note: Only successful applicants will be contacted.
